# DekaBank Deutsche Girozentrale

## Update to credit analysis

### Summary

We assign deposit and senior unsecured debt ratings of Aa2 to [DekaBank Deutsche Girozentrale](#) (DekaBank), junior senior unsecured debt ratings of A1, a Baseline Credit Assessment (BCA) of baa2 and an Adjusted BCA of a3. We further assign short-term deposit ratings of P-1 and Counterparty Risk Ratings (CRRs) of Aa2/P-1 to the bank.

DekaBank's Aa2 deposit and senior unsecured debt ratings reflect the bank's baa2 BCA, two notches of rating uplift from its membership in the institutional protection scheme of [Sparkassen-Finanzgruppe](#) (S-Finanzgruppe, Aa2 stable, a2<sup>1</sup>); the application of our Advanced Loss Given Failure (LGF) analysis to its liabilities, which indicates an extremely low loss given failure and results in three notches of rating uplift; and a one-notch rating uplift from government support, given its membership in the systemically relevant S-Finanzgruppe.

DekaBank's baa2 BCA reflects the bank's business model and status as the securities service provider for S-Finanzgruppe, which results in a high share of fee income. Despite this, DekaBank has a significant loan exposure, including from commercial real estate (CRE). The BCA also reflects the bank's strong capitalisation and sufficient profitability, which mitigate the asset risk stemming from its concentrated lending book. At the same time, the BCA incorporates the bank's high reliance on market funding, which is balanced by its access to an ample funding pool provided through excess deposits of S-Finanzgruppe's member banks.

Exhibit 1

### Rating scorecard - Key financial ratios

Source: Moody's Financial Metrics

## Credit strengths

- » High share of recurring fee income, supported by strong domestic savings rate
- » Sound capitalisation
- » Status as a core institution of S-Finanzgruppe

## Credit challenges

- » Partial reversal of prior reduction in problem loans, which reflects concentrated credit risk exposures in asset-based lending areas hit by the coronavirus pandemic
- » Dependence on wholesale funding
- » Higher cost of risk and depressed interest rate levels, which limit the contribution of non-fee income to the bank's results

## Outlook

The stable rating outlook reflects our view that DekaBank will continue to maintain a stable solvency and liquidity profile, and that the bank's liability structure provides for continued strong protection for senior creditors through loss-absorbing liabilities.

## Factors that could lead to an upgrade

- » An upgrade of DekaBank's ratings could result from an upgrade of its BCA. An upgrade of the BCA could, however, be offset by reduced affiliate support uplift.
- » DekaBank's BCA could be upgraded in the event of broad-based and significant improvement in solvency factors, in combination with a pronounced reduction in its market funding reliance.
- » Upward pressure from our Advanced LGF analysis could only arise for instruments ranking lower than senior unsecured debt, and only if DekaBank significantly increases its volume of subordinated instruments.

## Factors that could lead to a downgrade

- » A downgrade of DekaBank's ratings could be triggered by a downgrade of the bank's Adjusted BCA or by a reduction in the rating uplift resulting from our Advanced LGF analysis.
- » DekaBank's BCA could be strained in case of a higher reliance on or a weaker quality of market funding. In addition, DekaBank's BCA could be downgraded if additional risks emerge from its commercial banking activities; the bank fails to maintain capital ratios at strong levels; or profitability declines substantially. A downgrade of the BCA could, however, be offset by additional affiliate support uplift.
- » DekaBank's ratings could also be downgraded should there be a significant decrease in the bank's stock of loss-absorbing liabilities, which may lead to fewer notches of rating uplift from our Advanced LGF analysis.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on [www.moody's.com](http://www.moody's.com) for the most updated credit rating action information and rating history.

## Profile

DekaBank Deutsche Girozentrale is the securities service provider (Wertpapierhaus) for Sparkassen-Finanzgruppe (S-Finanzgruppe). On a combined basis, S-Finanzgruppe accounts for more than a third of the German banking system. As of 30 June 2021, DekaBank reported consolidated balance-sheet assets of €94 billion, while its total customer assets, comprising off-balance sheet assets under management and structured notes, amounted to €368 billion (€181 billion from retail customers and €187 billion from institutional customers).

DekaBank provides its private and institutional clients with a range of fund-based products, covering all major asset classes. It also offers real estate funds and financing; lending; capital market-related trading and sales services; treasury facilities, including liquidity, asset and liability management; and funding. As of 30 June 2021, DekaBank employed 4,823 employees (4,199 on a full-time equivalent basis), mainly operating from its headquarters in Frankfurt am Main and its most important foreign office in Luxembourg.

DekaBank was established on 1 January 1999 following the merger of DekaBank GmbH and Deutsche Girozentrale – Deutsche Kommunalbank. Since June 2011, the bank has been fully owned by the German Sparkassen (savings banks) through two joint shareholders: Deutsche Sparkassen-und Giroverband ö.K. (DSGV ö.K., the German Savings Banks Association) and Deka Erwerbsgesellschaft mbH & Co. KG.

For more information, please see DekaBank's [Issuer Profile](#).

### DekaBank's Weighted Macro Profile is Strong (+)

DekaBank's main exposures are located in Europe: 50% of total gross loan volume as of 30 June 2021 were located in its home market of [Germany](#) (Aaa stable), 28% in other euro area countries (thereof 2% in [Italy](#) [Baa3 stable] and [Spain](#) [Baa1 stable]), 9% in the [UK](#) (Aa3 stable), and the remaining 13% in other countries outside the euro area. Weighting by DekaBank's exposures results in a Strong (+) Macro Profile, on par with the Strong (+) [Macro Profile of Germany](#).

## Recent developments

All G-20 countries sustained severe output losses in 2020, but the contraction in some economies was sharper than in the others. We expect the pace of improvement to be asymmetric across countries. The recovery path is beset with uncertainty and will remain highly dependent on the distribution of vaccines, effective pandemic management and government policy support.

The [Government of Germany](#) (Aaa stable) launched a large stimulus package, and its support has been crucial for corporate borrowers in industries directly hurt by the pandemic, such as the airlines, tourism, retail and shipping sectors, and smaller companies experiencing weak liquidity and high leverage. The scale of the support package is unprecedented and is far larger than the support provided during the 2008-09 financial crisis. At the same time, the government made it easier to access its furlough scheme and extended it to a broader pool of workers, which will limit the spike in unemployment and the fall in domestic consumption. The measures, which are adapted to the evolution of the economic effects of the pandemic, add to Germany's already expansionary fiscal policy stance and to the automatic stabilisers that support household incomes when unemployment increases.

## Detailed credit considerations

### Following a temporary spike, problem loans resumed the multi-year downward trend

We assign a baa2 Asset Risk score, five notches below the aa3 initial score (which is conditioned by the bank's Strong (+) Weighted Macro Profile), reflecting DekaBank's credit risks from concentrated lending positions and market risk profile.

Due to its role as the securities service provider of S-Finanzgruppe, DekaBank's business risks are only partly driven by credit risks from its lending activities and are accordingly not reflected in the bank's problem loan ratio. Changes in the market value of underlying investments of the bank's fund management business have a direct impact on the magnitude of fee income derived and for some products may result in changes in provisioning needs resulting from contingent liabilities. Asset managers, including DekaBank, are exposed to operational and reputational risks, which can increasingly result from potential breaches of data security and customer privacy.

The economic shock caused by the pandemic caused a marked initial increase in the bank's problem loans to 2.0% of gross loans as of December 2020 from 0.7% as of year-end 2019, but during H1 2021, problem loans declined to €323.8 million or 1.1% of gross loans. Of the €324 million nonperforming exposures as of June 2021, €143 million related to the transport and export finance business, and €181 million stemmed from the property portfolio.

Exhibit 3

### Nonperforming loans (NPLs) increased markedly because of the pandemic-induced shock

The problem loan ratio is per our definition.

Sources: Company and Moody's Investors Service

DekaBank's transport finance book consists of ship and aircraft financing. Its €2.6 billion (December 2020: €2.9 billion) aircraft financing portfolio represented 51% of the bank's tangible common equity (TCE) as of 30 June 2021 and has been particularly strained by the economic downturn.

The second lending segment particularly exposed to the economic disruption caused by the pandemic is the bank's commercial real estate (CRE) lending segment. DekaBank's outstanding CRE loan volume increased moderately to €8 billion in June 2021 from €7.8 billion as of year-end 2020. In addition to CRE lending, DekaBank has further indirect exposure to commercial property markets through its €2.4 billion lending book (December 2020: €2.5 billion) as of 30 June 2021 and to its in-house mutual property funds. DekaBank's combined CRE lending segment is backed 7% by retail and 4% by hotel properties, both of which were hit particularly hard by lockdown measures and by the structural changes accelerated during the pandemic. However, the moderate portfolio shares of these subsegments compare favourably with CRE lender peers. At the same time, DekaBank benefits — to a limited extent because the bank's CRE lending business is focused on non-domestic markets — from the relative stability of its home market.

DekaBank's ship finance book decreased to €0.9 billion as of the end of first half of 2021 from €1.1 billion as of year-end 2020. Almost all of the remaining shipping loan book of DekaBank was underwritten after 2009 on the basis of more prudent lending standards than those used by German shipping lenders up to the global financial crisis. The reduction in legacy shipping loans had been a key driver of declining nonperforming loans (NPLs) before the pandemic.

Exhibit 4

**DekaBank's corporate lending exposures are focused on the real estate sector**  
**Breakdown of loans to non-financial private sector borrowers by industry, H1 2021**

Sources: H1 2021 Pillar 3 disclosure report and Moody's Investors Service

Apart from counterparty (credit) risk, DekaBank is exposed to considerable market risk related to investments and derivative positions. Accordingly, potential dislocations in capital markets that are more severe than those seen in H1 2020 represent tail risks for the bank's securities lending business. For certain fund-based retirement savings products, DekaBank provides capital guarantees to investors. As of 30 June 2021, the bank set aside €57 million in provisions (2020: €52 million) for potential liabilities in case fund returns for covering investor capital fall short.

**Capitalisation remains sound despite decline because of balance-sheet expansion**

We assign a Capital score of a2, three notches below the aa2 initial score, taking into account the bank's sound capitalisation, despite growing risk-weighted assets (RWA) and an improved leverage ratio. The negative adjustment reflects our expectation of a moderate future decline in capitalisation because of tighter regulatory risk measurement requirements and falling leverage in case DekaBank reflates its currently reduced total asset base.

DekaBank's TCE ratio, measured as TCE/RWA, increased to 16.5% as of June 2021 from 15.6% as of year-end 2020. At the same time, the bank reported a 15.3% transitional Common Equity Tier 1 (CET1) capital ratio. After results appropriation, the CET1 ratio was at 15.0%<sup>2</sup> as of year-end 2020. The bank's TCE leverage decreased moderately to 5.4% as of 30 June 2021 from 5.7% as of the year-end 2020. This decrease mainly reflected the strong increase by €8.8 billion to €94.1 billion of DekaBank's tangible assets during H1 2021. Similarly, credit risk-weighted assets (excluding CVA risk) increased by €2.4 billion to €20 billion, an effect that was more than offset by a €2.9 billion decline in market risk-weighted assets to €6.7 billion.

DekaBank uses internal models to calculate credit risk weights of €30 billion out of its €66 billion of net risk positions as of 30 June 2021, mainly in relation to its corporate lending book. The risk weights for the remaining €36 billion are calculated using the

standardised approach. Regulatory changes because of the phase-in of Basel IV requirements will limit the benefits of internal models, which will increase the bank's RWA over the medium term. A moderate weakening of capital ratios might result from certain legal risks, mainly stemming from investigations into past transactions in German stocks near the dividend payment dates. As of 30 June 2021, DekaBank's minimum capital requirements determined by the Supervisory and Review Process (SREP) were 8.44% on a CET1 basis and 12.32% on a total capital basis. DekaBank comfortably exceeded these levels at all times.

### High share of stable fee income provides earnings buffer

We assign a Profitability score of ba2, at the level of the initial score, reflecting DekaBank's stable earnings in a difficult economic and volatile capital market environment, and our expectation that the bank will be able to broadly maintain such stable profitability as economic activity recovers.

Based on our adjusted financials, DekaBank's net income increased by €82 million to €201 million as of 30 June 2021, from the same period a year earlier. DekaBank's net commission income, the bank's main profitability driver, increased by €162 million (28%) to €739 million as of June 2021 from the same period in 2020. Commissions from the investment fund business increased, in particular due to higher portfolio-related fees as a result of higher average total customer assets. Net interest income in H1 2021 declined by 22% to €75 million, but improved loan-loss provisions of €18 million (H1 2020: €69 million) brought DekaBank's net interest income after provisions to €93 million, up from €28 million in H1 2020. Within the more volatile non-fee and non-interest income operating result, the bank's trading profit declined to €74 million during the first half of 2021, down from €279 million a year earlier, but made a profit on financial instruments mandatorily measured at fair value of €10 million, after a loss of €29 million as of June 2020.

The fee income from its strong and profitable asset management franchise has proved to be an important buffer for credit and market-related losses, even as a shift toward passive investments could hurt the bank's asset-based margin in the long term. As the preferred retail asset manager of the savings banks sector and a leading provider of institutional investment funds, DekaBank's net fee and commission income accounted for 78% of net revenue as of 30 June 2021. Net new asset growth from the bank's actively managed retail investment products increased 60% to €11.1 billion during H1 2021 from the level a year earlier. Meanwhile, net new asset generation from the bank's institutional franchise declined 67% to €2.5 billion during the same period due to the one-off loss of a large-volume contract. Overall, this led to an increase in total customer assets to €368 billion in June 2021, up 8.6% from the level as of 30 June 2020.

Exhibit 7

### Net fees and commissions income supported earnings, while trading income improved

Note: Expenses and revenues of H1 2021 have been annualised.

Sources: Company and Moody's Investors Service

In addition to its results under International Financial Reporting Standards (IFRS), DekaBank reports an economic result to better represent its true economic position. This non-GAAP pretax measure incorporates several items not shown in the IFRS income statement, such as valuation gains and losses from hedged lending, actuarial gains and losses, potential charges and interest expense related to AT1 bonds (with the latter also being reclassified to interest expenses in our adjusted financials).

DekaBank's H1 2021 economic pretax result of €342.9 million (up from €162.5 million in H1 2020) was €9.0 million above the bank's IFRS result (H1 2020: €81.5 million below the IFRS result).

### Wholesale funding dependence mitigated by strong access to sector funding

We assign a Funding Structure score of ba3, four notches above the caa1 initial score, incorporating the bank's access to additional funding resources and the expected trend.

DekaBank is highly dependent on wholesale funds. More than half of the bank's balance sheet is funded through interbank repo and other short-term products, as shown in Exhibit 7, specifically institutional deposits. This high dependence on confidence-sensitive wholesale funding sources is balanced by DekaBank's strong and recurring access to funds from the savings bank sector, and substantial regular excess cash from its mutual funds franchise. The still-modest volume of €30 billion of customer loans (as of June 2021) is sufficiently matched by medium- and long-term funds.

Exhibit 8

### Composition of market funding sources

\*Market funds ratio = market funds/tangible banking assets.

Sources: Company and Moody's Investors Service

According to DekaBank, central bank funding accounted for 8.7% of its €17.2 billion of year-end 2020 money-market funding, up from 4.1% as of year-end 2019. The bank also sources funds through the ECB's targeted longer-term refinancing operations (TLTRO), but we expect this to be of temporary nature and to be repaid out of excess cash held by the bank.

By the end of June 2021, the bank's funding mix partly reverted its year-end 2020 change, with the share of money market instruments in the total funding mix increasing to 57% as of June 2021 from 52% as of year-end 2020 (December 2019: 59%). In particular, commercial paper issuance recovered moderately after a drop in its outstanding amount to €0.3 billion as of December 2020 from €10.7 billion as of year-end 2019. The bank moderately increased customer liabilities to €23.1 billion from €21.7 billion as of June 2021 and interbank funding rose to €21.6 billion from €17.1 billion.

From June 2021, a minimum regulatory Net Stable Funding Ratio (NSFR) of 100% came in force. At 118.5% as of June 2021, DekaBank comfortably complied with it, yet this metric will limit DekaBank's ability to shift its funding structure back toward shorter-term funding products such as its commercial paper programme. The regulatory minimum requirement for own funds and eligible liabilities (MREL) is a far less binding constraint for DekaBank. From 1 January 2022 on, the bank's MREL requirement will be set against both RWA and leverage exposure. As of June 2021, DekaBank reported very strong MREL ratios of 61.6% (against RWA) and 21.0% (against leverage exposure). DekaBank's MREL instruments included €6.2 billion of own funds and subordinated debt, €8.5 billion of junior senior unsecured liabilities and €4.3 billion of eligible senior unsecured debt.

### Highly liquid balance sheet despite asset encumbrance

We assign DekaBank a Liquid Resources score of a2, three notches below the initial score. The a2 assigned score takes into account the strong buffer of liquid resources based on cash, liquid securities and interbank claims. However, this buffer is reduced by a significant extent through encumbrance resulting from secured funding transactions.

About half of DekaBank's balance sheet can — in principle — be considered liquid, as shown in Exhibit 8, reflecting securities lending and reverse repo balances, cash and trading positions. However, a relevant share of these are encumbered. As of year-end 2020, DekaBank had provided €4.6 billion in liquid assets as collateral for derivative transactions, up from €0.8 billion as of year-end 2019. At the peak of 2020's market volatility in H1 2020, the bank had posted up to €7.7 billion of liquid assets as collateral, highlighting the need to maintain ample buffers for unforeseen market swings.

DekaBank's Day One liquidity potential of €3.2 billion and total unencumbered high-quality liquid resources eligible for the regulatory liquidity coverage ratio (LCR) of on average €23.2 billion during Q2 2021 provide sound buffers against such unforeseen market swings. Consequently, the LCR remained solid during H1 2021, averaging 166% in the first six months of 2021 and closing at 150% as of 30 June 2021 — 149% was the lowest and 199% was the highest level recorded during this period.

Exhibit 9

### Composition of liquid assets

\*Liquid banking assets ratio = liquid assets/tangible banking assets.

Sources: Company and Moody's Investors Service

Per June 2021, DekaBank raised its cash holdings to €18.7 billion from €9.2 billion as of year-end 2020. At the same time, liabilities to banks rose increased by €4.5 billion to €21.6 billion, mainly driven by repo and securities lending liabilities. We expect DekaBank's excess cash position to normalise upon the repayment of its undisclosed TLTRO borrowing amount.

## ESG considerations

In line with our general view of the banking sector, DekaBank has low exposure to environmental risks (see our [environmental heat map<sup>3</sup>](#) for further information).

In terms of social risks, in line with our general view of the banking sector, DekaBank has moderate exposure (see our [social heat map<sup>4</sup>](#)). This includes considerations in relation to the spread of the pandemic, because of the substantial implications for public health and safety, and the deteriorating global economic outlook, which is creating a severe and extensive credit shock across many sectors, regions and markets.

Corporate governance<sup>5</sup> is highly relevant for DekaBank, as it is to all issuers in the banking industry. DekaBank shows an appropriate risk management framework related to its risk appetite. Despite its past involvement in transactions around dividend payments, we do not have any particular governance concern for the bank, and do not apply any corporate behaviour adjustment for DekaBank. Nonetheless, corporate governance remains a key credit consideration because of new emerging risks and requires ongoing monitoring.

## Support and structural considerations

### Affiliate support

DekaBank benefits from cross-sector support from S-Finanzgruppe. This cross-sector support significantly reduces the probability of default, as it would be available to stabilise a distressed member bank and not just compensate for losses in resolution. We consider the readiness of the sector to support DekaBank to be Very High because of the bank's key service function for the sector, and its 100% ownership by the sector's savings banks. Cross-sector support continues to provide two notches of rating uplift from the baa2 BCA, leading to an a3 Adjusted BCA.

### Loss Given Failure (LGF) analysis

DekaBank is subject to the EU Bank Recovery and Resolution Directive (BRRD), which we consider an operational resolution regime. Therefore, we apply our Advanced LGF analysis, where we consider the risks faced by the different debt and deposit classes across the liability structure should the bank enter resolution.

We assume residual TCE of 3%, losses post-failure of 8% of tangible banking assets, a 26% proportion of junior deposits and a 25% run-off of these before failure and a 5% run-off in preferred deposits. These metrics are in line with our standard assumptions.

- » For deposits and senior unsecured debt, our LGF analysis indicates an extremely low loss given failure, leading us to position the Preliminary Rating Assessment at aa3, three notches above the a3 Adjusted BCA.
- » For junior senior unsecured debt, our LGF analysis indicates a very low loss given failure, leading us to position its Preliminary Rating Assessment at a1, two notches above the a3 Adjusted BCA.
- » For subordinated debt, our LGF analysis indicates a high loss given failure, leading us to position its Preliminary Rating Assessment at baa1, one notch below the a3 Adjusted BCA.
- » For the perpetual Additional Tier 1 notes issued in 2014, the Preliminary Rating Assessment is positioned at baa3, three notches below the a3 Adjusted BCA, reflecting our framework for rating non-viability contingent convertible securities.

### Government support considerations

Following the introduction of the BRRD, we have lowered our expectation of the degree of support the government might provide to a bank in Germany in the event of need. Because of its size on a consolidated basis, we consider S-Finanzgruppe systemically relevant. Therefore, we attribute a moderate probability of government support for all members of the sector, in line with our support assumptions for other systemically relevant banking groups in Europe. Therefore, we still include one notch of government support uplift in our CRRs and senior unsecured debt and deposit ratings of S-Finanzgruppe member banks that are incorporated in Germany,

including DekaBank. For junior securities, the likelihood of government support is low and these ratings do not include any related uplift.

### Counterparty Risk Ratings (CRRs)

#### DekaBank's CRRs are Aa2/P-1

The CRRs, before government support, are three notches above the Adjusted BCA of a3, reflecting the extremely low loss given failure from the high volume of instruments, primarily junior senior unsecured debt, that are subordinated to CRR liabilities. DekaBank's CRRs also benefit from one notch of rating uplift provided by government support, in line with our support assumptions on deposits and senior unsecured debt.

### Counterparty Risk (CR) Assessment

#### DekaBank's CR Assessment is Aa2(cr)/P-1(cr)

DekaBank's CR Assessment is four notches above the Adjusted BCA of a3, incorporating three notches of uplift derived from the buffer against default provided by more subordinated instruments, primarily junior senior unsecured debt, to the senior obligations represented by the CR Assessment; and one notch of government support uplift, assuming a moderate level of support. To determine the CR Assessment, we focus purely on subordination and we do not take into account the volume of the instrument class.

## Methodology and scorecard

### Methodology

The principal methodology used in rating DekaBank was the [Banks Methodology](#), published in July 2021.

### About Moody's Bank Scorecard

Our scorecard is designed to capture, express and explain in summary form our Rating Committee's judgement. When read in conjunction with our research, a fulsome presentation of our judgement is expressed. As a result, the output of our scorecard might significantly differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The scorecard output and the individual scores are discussed in rating committees and can be adjusted up or down to reflect conditions specific to each rated entity.

## Rating methodology and scorecard factors

## Endnotes

- 1 The ratings shown are S-Finanzgruppe's Corporate Family Ratings, outlook and BCA.
- 2 DekaBank's CET1 ratio before earnings-appropriation stood at 14.2% as of 31 December 2020.
- 3 Environmental risks can be defined as environmental hazards encompassing the effects of air pollution, soil/water pollution, water shortages, and natural and human-made hazards (physical risks). Additionally, regulatory or policy risks — such as the effect of carbon regulation or other regulatory restrictions, including the related transition risks such as policy, legal, technology and market shifts — that could impair the evaluation of assets are an important factor. Certain banks could face a higher risk from concentrated lending to individual sectors or operations exposed to the aforementioned risks.
- 4 Social risk considerations represent a broad spectrum, including customer relations, human capital, demographic and social trends, health and safety, and responsible production. The most relevant social risks for banks arise from the way they interact with their customers. Social risks are particularly high in the area of data security and customer privacy, which are mitigated by sizeable technology investments and banks' long track record of handling sensitive client data. Fines and reputational damage because of product mis-selling or other types of misconduct are further social risks. Social trends are also relevant in a number of areas, such as shifting customer preferences toward digital banking services increasing information technology costs, ageing population concerns in several countries straining demand for financial services or socially driven policy agendas translating into regulations that strain banks' revenue bases.
- 5 Corporate governance is a well-established key driver for banks, and the related risks are typically included in our evaluation of the banks' financial profile. Further factors such as specific corporate behaviour, key-person risk, insider and related-party risk, strategy and management risk factors, and dividend policy may be captured in individual adjustments to the BCA, if deemed applicable. When credit quality deteriorates because of poor governance, such as a breakdown in controls resulting in financial misconduct, it can take a long time to recover.

CREDIT RATINGS ISSUED BY MOODY'S CREDIT RATINGS AFFILIATES ARE THEIR CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES, AND MATERIALS, PRODUCTS, SERVICES AND INFORMATION PUBLISHED BY MOODY'S (COLLECTIVELY, "PUBLICATIONS") MAY INCLUDE SUCH CURRENT OPINIONS. MOODY'S DEFINES CREDIT RISK AS THE RISK THAT AN ENTITY MAY NOT MEET ITS CONTRACTUAL FINANCIAL OBLIGATIONS AS THEY COME DUE AND ANY ESTIMATED FINANCIAL LOSS IN THE EVENT OF DEFAULT OR IMPAIRMENT. SEE APPLICABLE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLISHED BY MOODY'S ANALYTICS, INC. AND/OR ITS AFFILIATES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS, NON-CREDIT ASSESSMENTS ("ASSESSMENTS"), AND OTHER OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. AND/OR ITS AFFILIATES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at [www.moody.com](http://www.moody.com) under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY125,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
